

SOLUTIONS FOR POWER  
ENGINEERING SYSTEMS

# THE CONTROL CABINET INTERIOR DESIGNER

Many years of experience, modern well-equipped machinery and the constant desire to find the right solution for all possible problems make Promet into a reliable partner for any issues regarding energy and control technology.

As an innovative production company with a view to the future, we focus on intelligent and networked machines (CIM production). We are already in the 4th stage of the industrial revolution today (Industry 4.0).

Promet supports customers in the planning and design of wiring systems, busbars, metal and plastic products and modules and subsequently produces 100% in their own highly automated production facilities.

- ProFlex reduces the complexity of switchgears in a unique way, saving time, space and costs.
- We design, produce and coat busbars made of copper, aluminum and Cuponal. For this purpose, we offer innovative concepts and fully automated machines.
- We rely on a comprehensive range of services in terms of sheet metal processing, powder coating, manufacturing with lasers and latest versions of bending technology.
- We offer our customers the complete machining and assembly of modules, from the product specification up to the final technical inspection.

## PROMET - GROUP

Promet, with its headquarters in Kirchberg in Switzerland and another production site in Germany, is the specialist in engineering solutions for the energy industry and control technology. At all locations, Promet uses the most modern technologies in production. Innovative concepts and solutions can be implemented efficiently and with minimum cost. Thanks to the latest methods, Promet is able to optimize product features and to reduce the costs of the final product significantly.
